Native North American

FERNS and WILD FLOWERS

for FALL, 1932 PLANTING

GEORGE D. AIKEN

Putney Vermont

VIOLA BLANDA (Sweet White Violet) (See page 19)

North American Wild Flowers

Our fourth catalog of native North American Wild Flowers and Ferns contains many delightful species which we have not listed heretofore. For this season's sales we have easily the best supply we have ever had. We have several thousand fine plants of Trailing Arbutus and Fringed Gentian, as well as all varieties of Ladyslipper native to eastern North America.

The support which has been given our work in growing our native plants has been highly gratifying, and we hope this season to sell more than ever. Without the help of our customers who buy these plants, we should be unable to continue our work in putting the propagating and growing of rare wild flowers on a commercial basis, and unless this is done, many of the finest varieties will become very scarce indeed within a few years.

ABOUT PRICES—As we ship our plants to all the states and many far corners of the earth, we necessarily make all prices f.o.b. Putney, Vermont. Unless instructed otherwise we will send either by mail or express collect, whichever seems best.

TERMS—Fifty or more plants of one variety will be sold at 100 rates; 250 or more of one variety will be sold at 1000 rates.

Time to Plant—In general, most wild flowers transplant best in late August and September, although there are exceptions to this rule.

VISITORS—We are always glad to have people interested in the growing of wild flowers visit our nurseries.

Would you like

A BOOK ON GROWING WILD FLOWERS?

We are continually getting requests for more complete cultural directions for wild flowers than are given in this small catalog. While we would like to make our catalog more complete and with more instructions, yet we cannot afford to make it any more entertaining and instructive than it is now. We receive requests for hundreds of copies each year from schools and colleges for classroom work.

If the people who are interested in wild flowers and their culture show sufficient interest in a more complete work, well illustrated and free from advertising, to purchase enough copies to warrant the printing of such a book, we shall be glad to provide it. The price would not be exorbitant. If you are willing to buy a book of this nature, will you tell me so at once?

GEORGE D. AIKEN, PUTNEY, VERMONT

North American Wild Flowers

	3	12	100	1000
ACONITUM uncinatum (Clambering Monkshood). This is the				
native climbing Monkshood of the Southern Mountains. Its at-				
tractive blue flowers are most noticeable in July. It likes rich soil				
in partial shade	0.60	\$2.00	\$15.00	
in partial shade	,0,00	Q=100	010.00	
and desirable for bogs. It grows 2 ft. tall	.50		8.00	\$60.00
ACTAEA alba (White Baneberry). Growing in rich hardwoods, the	.00	1.00	3.00	\$60.00
White Baneberry with its fluffy flowerheads and later, the pure white				
berries on crimson stems is one of our finest native flowers. It grows	0.0	0.00	1 5 00	107 00
from 2 to 2½ ft. tall	.60	2.00	15.00	125.00
rubra (Red Baneberry). When in bloom, this can hardly be told from				
the White Baneberry, but the fruit is a dazzling scarlet. It is not				
quite so tall and is at home under partial shade	.60	2.00	15.00	125.00
ANAPHALIS margaritacea (Pearly Everlasting). The tall white				
Everlasting which is known to everyone who spent their childhood				
on an Eastern farm and which is used to considerable extent in dried				
	.60	1.50	12.00	100.00
bouquets by florists. ANEMONE canadensis (Meadow Anemone). This variety continues				200.00
the loveliness of the Windflower on a larger scale, attaining a height				
of 12 to 18 in, with flowers an inch or more broad. May to August	.60	1.75	12.00	
cylindrica (Thimbleweed). The tallest growing native Anemone,	.00	1.19	12.00	
holding its beautiful, creamy white blossoms over 2 ft. from the				
ground. The seeds are in late Summer in a mass of wool, causing				
the school children to call this plant "Sheep's Wool." It prefers full	0.0		40.00	
sun	.60	1.75	10.00	80.00
quinquefolia (Windflower). This is one of the loveliest of our native				
flowers, and is quite easy to grow in moist shade. Its pure white				
blossoms grow on 4 in. stems and bloom in May	.60	1.75	10.00	80.00
ANEMONELLA thalictroides (Rue Anemone). This is very much like				
the Windflower, except that it has several flowers to the stem	.60	2.00	15.00	
AQUILEGIA canadensis (American Columbine). Our wonderful				
native Columbine so hardy and so delightful in the rock garden,				
yielding a profusion of red and yellow flowers about Memorial Day.				
It will grow in either sun or shade and reaches about a foot in height.	.60	2.00	12.00	110.00
caerulea (Colorado Columbine). The state flower of Colorado. It				
bears immense blue and white blossoms on rather fragile stems	.60	2.00	15.00	140.00
chrysantha. This bright yellow, long spurred Aquilegia from the			20.00	_ 10.00
Rocky Mountains is very easy to grow and blooms nearly all Sum-				
mer in sun or partial shade. It grows 2 ft. or more in height	60	2.00	15.00	140.00
or partial shade. It glows a it. of more in height	.00	2.00	10.00	140.00

Arisaema (Jack-in-the-pulpit) (See page 4)

Actaea rubra (Red Baneberry)

Prices per	3	12	100	1000
ARALIA hispida (Bristly Sarsaparilla). This Aralia will grow in full				
sun. Its greenish yellow flowers are borne in June on 1 to 2 ft. plants.	0.60	\$1.50	\$10.00	
It has blue fruit in Autumn	0.00	\$1.00	\$10.00	
yellowish flowers in May are not conspicuous, the large blue berries				
in late Summer make it a desirable plant. It grows 1 ft. tall	.60	1.50	10.00	\$90.00
racemosa (Spikenard). This also has a greenish white flower in May,				
but the berries are red. It grows 2 ft. tall in moist shade	.60	2.00	15.00	
ARISAEMA dracontium (Green Dragon). Is not as savage as it				
sounds, but is a peculiar form of Jack in which the spadex is long				
and tapering like a bayonet	.75	2.50		
tryphyllum (Jack-in-the-pulpit). Jack is a most agreeable inhabitant				
of the wild garden making friends with everyone, especially the				
children. He will grow 12-15 in. tall in moist shade. We can furnish				
either the common purple or green variety	.60	1.50	12.00	
ASARUM canadense (Gingerroot, Wild Ginger). A plant that is				
different. It bears curious brown flowers on creeping stalks in				
April, has beautiful foliage and a ginger flavored root. It prefers				
hardwood shade	.60	1.50	10.00	80.00
ASCLEPIAS incarnata (Swamp Milkweed). The reddish flowers are				
borne on 2 to 3 ft. stalks in July and are most attractive. It is most		_		
at home in bogs	.60	2.00	15.00	140.00
tuberosa (Butterflyweed). This may be the most gorgeous of all				
wild flowers, and the orange flowers growing on the dry, sunny banks				
in July always attract much attention. It grows to about 2 ft. in	60	9.00	15.00	140.0
height	.60	2.00	15.00	140.00
ASTER cordifolius (Heartleaved Aster). A roadside Aster with lilac				
flowers borne in great masses during September and October. It	0.0		10.00	
prefers partial shade and is from 1 to 2 and 3 ft. tall	.60	1.50	10.00	80.0
ericoides (Heath Aster). This Aster is also from 1 to 2 ft. tall, and				
bears such a profusion of white, snowflake-like flowers in Autumn	60	1.50	10.00	90.00
as to form imitation snow drifts	.60	1.50	10.00	80.00
novae-angliae (New England Aster). A tall, magnificent Aster, which splashes the fields and roadsides with varying shades of				
purple during September	.60	1.50	12.00	100.00
novae-angliae rosea (Pink New England Aster). This is a pink	.00	1.00	12.00	100.00
variation of the New England Aster	.60	2.00	15.00	
novibelgi (New York Aster). The wild blue violet Aster from which				
most of the named varieties of garden Asters have been selected.				
It prefers the open meadows	.60	1.75	12.00	100.00
puniceus (Swamp Aster). A very tall, lavender colored Aster for				
shady bogs.	.60	1.50	12.00	
umbellatus. This is a tall growing white Aster for moist woods	.60	1.50	12.00	100.00
undullatum. Pale blue, tall growing variety	.60	1.50	12.00	100.00
BAPTISIA bracteata (White Wild-indigo). This Baptisia has tall				
spikes of pure white, and prefers the open dry slope. It attains a	0.0	0.00		
height of 3 ftleucantha (Cream Wild-indigo). The earliest of the Baptisias to	.60	2.00	15.00	120.00
blossom, bearing drooping spikes of cream white flowers in June.	60	0.00	15.00	100.00
It grows 12 to 15 in. tall and likes full sun	.60	2.00	15.00	120.00
tinctoria (Yellow Wild-indigo). The common name describes this va-	.60	2.00	15.00	
riety of Baptisia. It grows 2-3 ft. high and blossoms in late Summer	.00	2.00	10.00	
CALLA palustris (Wild Calla). The miniature white Callas grow 6 in.				
tall in shady bogs and are one of the most charming inhabitants of	60	1.50	12.00	100.00
the wet places	.60	1.50	12.00	100.00
CALLIRHOE involucrata (Poppy Mallow). This is a sprawling plant				
for dry, sunny slopes, spreading 3 ft. across and bearing ex-				
tremely brilliant flowers of pure magenta, a beautiful color, not the	60	9.00	15.00	130.0
usual so-called magenta. It blossoms in Julytriangulata. An erect growing Poppy Mallow from the Prairie	.60	2.00	15.00	130.00
States, attaining a height of 18 in. and bearing its flowers in panicles.	.60	1.75	12.00	
	.00	1.70	12.00	
CALOCHORTUS albus (White Globe Tulip). This is a native of the				
western states. It should be grown in open sun and grows to about 8 in. in height	.25	.75	6.00	55.00
amabilis (Yellow Globe Tulip). Another Calochortus which grows to	.20	.10	0.00	00.00
be about 8 in. tall. This is one of the easiest to grow and has been				
very satisfactory with us	.25	.75	6.00	55.00
venustus (Mariposa Tulip). Its coloring varies, but is mostly white	.20		0.00	00.0
with varicolored markings. It seems to stand our Winters safely				
and is a welcome immigrant from the Pacific states	.40	1.25	10.00	
CALOPOGON pulchellus. Dainty little Orchid growing in bogs. Of				
similar color to the Pogonia, but bearing several flowers on a stalk.				
Blossoms in June and July on 12 in. stems	.75	2.50	18.00	
Diocomo in June and July on 12 III. Stellis		2.00	10.00	

Calypso bulbosa

Caltha palustris (Wild Marshmarigold)

Prices per	3	12	100	1000
CALTHA palustris (Wild Marshmarigold). One of our best native wild flowers, and with its gleaming golden flowers borne in greatest profusion, brightens the meadows and bogs in early Spring	0.60	\$1.50	\$10.00	\$80.00
CALYPSO bulbosa. A rare little Orchid growing only 2 in. tall, found principally in the Western Mountains, but naturalized to some extent in the East	1.00	3.50		
CAMAS: IA esculenta (Wild Hyacinth). The Camassias are excellent for mass planting in moist or semi-shady locations. The bulbs were a favorite food of the Indians. The plants grow to about 2 ft. in height and the flowers vary from cream to blue	.60	1.50	10.00	75.00
leichtlini. This is a taller growing, rare variety, usually in deep blue. The Camassias blossom in May with us	.60	1.75	12.00	100.00
CAMPANULA rotundifolia (Bluebells of Scotland). This plant seems fragile, but when once established in the cracks and ledges or in almost any other situation, it seems to live indefinitely and yields a profusion of delicate blue bells throughout the Summer	.60	2.00	15.00	135.00
CASSIA marilandica (Wild Senna). A shrubby perennial from 3 to 5 ft. tall, bearing large clusters of yellow, pea-shaped flowers in late Summer, and rather attractive, fernlike foliage. It prefers an open, moist location.	.60	2.00	15.00	
CAULOPHYLLUM thalictroides (Blue Cohosh). The new shoots of the Blue Cohosh are a royal purple. The flowers are yellow with purple sepals and the fruit in late Summer is purple. It grows 2 tt. tall in rich woods	.60	1.50	10.00	75.00
CHELONE glabra (Turtlehead). Although quite common, the Turtlehead is indispensable in bog gardens. Its Snapdragonlike flowers are produced in late Summer on 2 ft. stems, in moist shade or sun	.60	1.50	10.00	80.00
CHIMAPHILA maculata (Spotted Pipsissewa). Instead of the solid green leaves of the common Pipsissewa, this variety is splotched with white along the midrib, and the flowers are also whiter umbellata (Pipsissewa). If this plant were a more robust grower, it would be the finest ground cover for shade. It grows after the fashion of Pachysandra and produces its white flowers in July and	1.00	3.00		11717
August	.60	2.00	12.00	
CHIOGENES hispidula (Creeping Snowberry). One of the most beautiful little creeping evergreen vines of the North woods. It is perfectly happy when growing over a rotten Hemlock or Spruce log and so must have very acid soil in which to thrive. The waxy white berries in Fall give it its common name	1.00	3.00	25.00	
CHRYSANTHEMUM leucanthemum (White Daisy). Our common white Daisy so necessary at graduation time		1.50	8.00	75.00
This principles is the F-II 1022 and and down the first the first the F-II 1022 and and down the first the				10.00

CICUTA maculata (Waterhemlock). This plant has immense pure white umbels of flowers in June and July. It is a giant among native plants, growing several feet tall in rich moist shade. It is supposed				
to be poisonous	\$0.60	\$2.00		
grow to a height of 2 to 3 ft. in moist shade racemosa (Black Cohosh). The picturesque spikes of this Cimicifuga	.60	2.00	\$15.00	\$120.00
blossom in August, in moist, partial shade. Its height is from 4 to 6 ft	.60	2.00	15.00	120.00
flowers of this plant come in early Spring. It prefers partial shade and grows to be from 4 to 6 in. tall	.50	1.00	8.00	60.00
of this Clintonia, the glossy green, prostrate leaves and the bright blue berries in late Summer make this a welcome inhabitant of the woods. It is 8 in. tall	.50	1.50	10.00	80.00
COPTIS trifolia (Goldthread). This plant gets its name from the golden threadlike roots. The leaves are almost evergreen and the white flowers grow on 3 to 6 in. stems in May	.50	1.50	8.00	60.00
CORNUS canadensis (Bunchberry). Bunchberry is an excellent ground cover for acid soil. The flowers resemble those of the Cornus floridus and the fruit is a bright red. Its leaves are semi-evergreen.	,,,,	2.00	0.00	00.00
In shade it grows to be 6 in. tall	.60	2.00	15.00	135.00
June in open sun or partial shade. It is 2 ft. tall	.60	2.00	15.00	*****
largest flowered Ladyslipper will grow also in hardwood shade and sometimes in open sun, if the soil is acid. It blossoms in May acaule alba (White Moccasin Flower). We have a few hundred plants of the snow white Cypripedium acaule. One of the rarest Lady-	.60	2.00	15.00	135.00
slippers, which requires similar treatment to its pink relative arietinum (Ramshead Ladyslipper). A beautiful, small, rare Ladyslipper, colored red and white, with prominent veins, blooming	3.00	10.00		
about June 1	3.00	10.00		
yellow ribbons are borne several on a stalk	1.50	5.00		
if the soil is sweet	3.00	10.00		• • • • •
tains. It seems to grow readily here in Vermont in strong, slightly acid soil pubescens (Yellow Ladyslipper). The Yellow Ladyslipper is the	1.50	5.00		• • • •
most easily domesticated of the Ladyslippers. It is grown in full sun or shade, and is very fragrant. Its clear yellow flowers have brown or green sepals. The dividing line between parviflorum and pubescens is so faint that we are offering but the				
above named variety spectabile (Showy Lady-	1.00	3.50	25.00	225.00
slipper). The spectabile is considered the most desirable of our native orchids of the north. It will grow in moist shade, about 2 ft. tall and blossoms freely in June.	1.15	4.00	30.00	275.00
DALIBARDA repens. A splendid little plant of the rich hardwoods. The leaves are evergreen and the white Hepaticalike blossoms				
Dicentra cucullaria (Dutchmans-breeches (See page 7)	.75	2.00	15.00	135.00

Erythronium albidum (White Troutlily) (See page 8)

Prices per 3 12 100	1000
DELPHINIUM tricorne (Rock Larkspur). A delightful little dark blue wild Delphinium from the central states. I ft. tall and blossoms before any of the cultivated Delphiniums. It is very attractive and the plants seem long lived when planted in the open sun and given	2100.00
reasonable care	100.00
clusters in early Spring. The plant attains a height of 1 ft. in moist shade	90.00
DIANTHUS deltoides (Maiden Pink). The foliage of this Maiden Pink is grasslike and the blossoms are borne profusely in June	110.00
DICENTRA canadensis (Squirrelcorn). This is a splendid rock plant	22000
with dainty, fernlike foliage. The flowers are white and heart-shaped with pink edges	60.00
blossoms like the Squirrelcorn except that the blossoms are edged with yellow instead of pink	75.00
foliage and pink flowers, which blossoms throughout the Summer. It grows about 1 ft. tall in moist, partial shade	110.00
DIONAEA muscipula (Venus Flytrap). A queer little plant with tastes similar to the Pitcherplant, for when insects alight on the flat, hairy leaves, they close up on the prisoner and the plant digests him at its leisure. For bogs	
DODECATHEON meadia (Shootingstar). This is a delightful con-	
tribution from the Central West. The blossoms vary from white to purple. Shootingstar likes the full sun or the open woods	100.00
borne on 4 to 5 in. stems, but the curious hairy leaves are what make this plant desirable for the moist, open land	100.00
ECHINACEA angustifolia (Narrowleaf Coneflower). A low growing Coneflower less than 1 ft. tall. From the limestone cliffs and slopes of the Central States	
purpurea (Purple Coneflower). A pink, Daisylike flower from the	
open fields of the Central States. It grows 2 ft. tall	135.00
EPIGAEA repens (Trailing-arbutus). This is the well known May-flower. It must have acid soil and likes partial shade. The plants are shipped with a ball of earth	
EPILOBIUM angustifolium (Fireweed). The blossoms of the Fire-	
weed are brilliant masses of magenta on the hillsides in July60 1.50 10.00 angustifolium alba (White-flowered Fireweed). A beautiful white	90.00
sport of the Fireweed, which was found on one of our Vermont mountains. It spreads from creeping root stocks 1.50	

Prices per	3	12	100	1000
ERYTHRONIUM albidum (White Troutlily). The easiest Troutlily to grow and a really worthwhile wild flower to plant in quantity	0.50	\$1.00	\$8.00	\$60.00
americanum. The common Adders-tongue of the Eastern States.	0.00	\$1.00	SO.00	\$00.00
with its yellow Lilylike blossoms in the Spring and the spotted leaves. californicum. A fine little Troutlily bearing several clear yellow blossoms on a stalk. Apparently the most easy to grow of the	.50	1.25	10.00	80.00
Western Erythroniums. gigantea (Glacierlily). This is a large white Erythronium from the	.50	1.00	7.00	
Western States, and is often called Glacierlily	.50	1.00	7.00	
hendersoni (Henderson Troutlily). A delightful Erythronium from the Pacific coast, which seems to thrive well here in the East. It is				
a rich, royal purple in color	.50	1.00	7.00	
EUPATORIUM coelestinum (Mistflower). The flowers of the Mistflower are like beautiful blue Ageratum on 2 ft. stems. It likes the				
open woods and blossoms in August	.60	2.00	15.00	
perfoliatum (Thoroughwort). A white flowered herb of the bogs,	.60	1.50	12.00	100.00
growing to 2 to 3 ft. tall and blooming in August purpureum (Joe-pye-weed). Flower heads of rosy purple on 4 to 6 ft.	.00	1.50	12.00	100.00
stalks rise from the bogs in August	.60	1.50	12.00	100.00
urticaefolium (Snow Thoroughwort). The broad flower heads of purest white blossom in August and September. This is one of the				
finest plants for massing. It prefers a moist shade and grows 2 to 3 ft. tall.	.60	1.50	10.00	80.00
EUPHORBIA corollata (Flowering Spurge). Through the late Summer				
Euphorbia corollata is even better than Gypsophila Bristol Fairy				
to use in mixed bouquets, as it has stiffer stems. It grows naturally about 2 ft. tall in sandy fields or open woodlands	.60	1.50	12.00	100.00
FILIPENDULA rubra (Pink Spiraea). The wild pink Spiraea of the	100	1.00	12.00	200.00
Central States. 2 ft. tall. July	.60	2.00	15.00	
GALAX aphylla (Galax). This is a wild flower from the Southern				
Mountain, and thrives in the north in acid soil. The spikes of white flower in June. Evergreen leaves	.60	2.00	15.00	135.00
GAULTHERIA procumbens (Checkerberry). A ground cover, used	.00	2.00	10.00	100.00
in partial shade or sun, with flowers like Blueberry blossoms. It				
requires acid soil	.60	1.50	12.00	100.00
GENTIANA andrewsi (Blind Gentian). The blossoms of the Blind Gentian are the most intense blue of all wild flowers and is easily				
grown in moist shade or sun. It is 2 ft. tall and blossoms freely in				
September	.60	2.00	15.00	135.00

Gentiana crinita (Fringed Gentian) (See page 9)

roadsides and woods adds gaiety to the late Summer and Autumn divaricatus (Woodland Sunflower). A rather delicate Sunflower from	.00	1.50	9.00	75.00
2 to 4 ft. tall, which lacks the coarse appearance of most of our Sunflowers	.60	2.00	15.00	
age. The color of the blossoms varies from white to pink and purple. It is indispensable for rich woods. It is about 8 in. tall and blossoms in April.	.60	1.75	12.00	100.00
triloba (Roundlobe Hepatica). The flowers of this Hepatica are	.00	2.10	12.00	100.00
mostly pale blue or white. It prefers slightly acid soil and shade, but is not so strong a grower as the sharplobe Hepatica	.60	1.75	12.00	100.00
blue and white blossoms is a biennial and should be planted in the open sun or partial shade for blossoms the following Spring. It grows 3 to 4 in. tall. HYDRASTIS canadensis (Goldenseal). This is a plant of medicinal	.60	1.50	8.00	60.00
fame, its value is due more to its romantic history than its actual beauty. HYDROPHYLLUM virginianum (Waterleaf). A plant growing 1 ft.	.60	2.00		
high, with purplish white flowers blossoming in Midsummer in moist shade.	.60	1.50	12.00	100.00
HYPOXIS hirsuta (The Yellow Stargrass). A tiny yellow companion for the Blue-eyed Grass, growing in fields and open thickets. It blossoms in May and June	.60	2.00	15.00	
INULA helenium (Elecampane). The open fields are the homes of this Elecampane, with its Sunflowerlike flowers blossoming in Midsum-				
mer in moist shade	.60	2.00	15.00	
fine plant for rock gardens, and grows in either sun or shade	.60	2.00	15.00	125.00
cristata alba (White Crested Iris). One of our rarest native plants. Sold in single divisions				
prismatica (Cubeseed Iris). A native New England waterside plant				
with grasslike foliage and narrow petaled flowers pseudacorus (Yellow Waterflag). A splendid Iris for naturalizing by	.60	1.50	12.00	100.00
ponds and streams, but will grow anywhere. The flowers resemble				
those of a golden yellow Japanese Iris. It grows 2 to 4 ft. in height and blossoms in June	.90	2.50	16.00	140.00
verna (Vernal Iris). Charmingly modest, the sky blue flowers of the				
Iris verna are most at home in the dry woods or in the rockery. It grows 4 in tall.	.90	2.50	15.00	135.00
versicolor (Blueflag). Our native Blueflag, surely indispensable for the brookside or bog garden	.60	1.50	10.00	80.00

Prices per	3	12	100	1000
ISOPYRUM biternatum (False Rue Anemone). Common in the moist thickets from Minnesota and Southward. This plant bears				
white petal-less flowers in early Spring		\$1.75	\$12.00	
JEFFERSONIA diphylla (Twinleaf). A Spring flowering plant, growing 6-12 in. high. The blossoms are white, similar to Hepaticas LEUCOCRINIUM montanum (Colorado Sand Lily). A tiny, little	.60	2.00	15.00	
plant whose fragiant white flower clusters are borne early in the Spring on stems a few inches high.		2.00	15.00	
LEWISIA rediviva (Bitterroot). This state flower of Montana succeeds well on the open, sandy soil in the East. The large, pale pink or white blossoms look much like Waterlily blossoms set on the sand	.75	2.50	18.00	
LIATRIS pycnostachys (Cattail Gayfeather). This tallest of the Gayfeathers grows to about 3 ft. or more in height and exhibits deep	eo.	9.00	15.00	
pink blossoms in Augustscariosa (Button Gayfeather). The Button Gayfeather grows only	.60	2.00	15.00	
2 ft. tall and the buttonlike flowers are produced in Midsummer spicata (Spike Gayfeather). This Gayfeather is best known for the	.50	1.50	10.00	\$80.00
beauty of its spikes which are deep rose and attain a height of $2\frac{1}{2}$ ft. All Gayfeathers are crazy, for instead of starting to blossom at the bottom of the spikes like other flowers, they start at the top and blossom	.60	2.00	12.00	100.00
downward.				
LILIUM canadense (Meadow Lily). If any plants are necessary for successful naturalistic planting, they are the wild Lilies. As its name suggests, the Meadow Lily prefers the rich, moist meadows and in July, its blossoms vary from pale yellow to red and are most attrac-				
tive. They grow on 3 to 5 ft. stems	.60 .90		$\frac{12.00}{20.00}$	100.00 175.00
carolinianum (Carolina Lily). A very fragrant Lily with orange colored flowers. It grows from 3 to 4 ft. in height and blossoms in Midsummer.	1.00	2.75		
grayi (Grays Lily). A small, dark red Lily doing best in acid soil. It is the darkest colored of our native Lilies	.75	2.50	20.00	175.00
pardalinum (Leopard Bog Lily). From the Pacific Coast. Orange scarlet and brown, growing naturally on hummocks in bogs philadelphicum (Wood Lily). The brilliant splashes of red among		5.00		
the Sweet Fern and Blueberry bushes is accounted for by the Wood Lily. It grows best in acid soil and attains a height of 2 ft superbum (Turkscap Lily). The tallest native Lily, growing 5 ft.	.60	2.00	15.00	120.00
high and producing its orange colored blossoms profusely in the meadows or partial shade in July.	.60	2.00	15.00	120.00
LINARIA vulgaris (Butter-and-eggs). A plant that is easily grown in light open soil and blossoms in June and July. The blossoms are like yellow Snapdragons.	.60	1.50	8.00	60.00
LINNAEA americana (Twinflower). The dainty pink flowers of this plant are borne on prostrate vines. To appreciate the beauty of the Twinflower one should see it completely covering a rotten log with its trailing appropriate foliage.	.75	2.50	18.00	
its trailing evergreen foliage	.10	2.00	18.00	
flowers in Midsummerloeseli (Loesel Twayblade). Grows wild in company with Lily Tway-	1.00	3.00		
blade but with yellowish green flowers	1.00	3.00		
of the Middle States. Puccoon is 6-18 in. tall. It has yellow flowers borne in clusters in May and June	.60	1.75	12.00	
brooks and ponds should be planted where the ground does not freeze. It blossoms in August and grows to be 1 to 2 ft. tall spicata (Common Blue Lobelia). A plant which blossoms in July and	.60	2.00	13.50	120.00
August growing from 1 to 2 ft. tall in the open fields and pastures syphilitica (Large Blue Lobelia). This large blue Lobelia corresponds	.50	1.50	10.00	75.00
closely to the Cardinalflower except that the blossoms are blue in color	.60	2.00	13.50	120.00
native plant. It is a very useful ground cover for dry banks. The attractive yellow flowers are borne in July	.60	1.75	12.00	100.00
quadrifolia (Whorled Loosestrife). In July, the bogs are gay with this bright yellow flower. They grow 2 ft. highterrestris (Swampcandle). Well described by its common name. Bright yellow candles on 2 in sticks. Blossoms in bogs in late	.60	1.50	10.00	90.00
Bright yellow candles on 2 in. sticks. Blossoms in bogs in late Summer.	.60	2.00	15.00

Myosotis scorpioides (True Forget-me-not) (See page 13)

Prices per	3	12	100	1000
LYTHRUM salicaria roseum (Purple Loosestrife). A naturalized immigrant that brightens the bogs and meadows in July and August. It grows from 2 to 3 ft. tall	0.60	\$1.75	\$12.00	\$100.00
MAIANTHEMUM canadensis (Canadian Mayflower or Wild Lily-of- the-valley). A very beautiful wild flower native to the dry woods of the North. The spikes of fluffy white, fragrant flowers attain a height of about 4 in. and are borne about the last of May, followed by red berries later in the season.	.60	1.50	10.00	80.00
MEDEOLA virginica (Cucumber-root). The greenish yellow flowers of the Cucumber-root are borne on 1 to 2 ft. stems and are followed by blue berries in the Summer, but the curious whorled leaves and white fleshy root which resembles Cucumber in flavor are what attract the most attention to this plant	.50	1.50	10.00	75.00
MENTHA peperita (Peppermint). We believe it is unnecessary to describe this plant, but every one should have it for the brookside spicata (Spearmint). The flavor at least of the Spearmint is known to all Americans, if the plant itself is not, but it is an attractive waterside plant and the leaves are useful for many purposes	.60	1.75 1.75		100.00
MERTENSIA virginica (Virginia Bluebells). This plant, with its nod- ding bluebells, blossoming pink and turning to the clearest blue is one of the most desirable Spring blossoming plants for sun or shade. It should be planted in masses for the best effect. We sell more of this than any other native plant.	.60	1.50	10.00	75.00
MIMULUS ringens (Monkeyflower). On stems from 1 to 2 ft. tall, the grinning blue Monkeyflowers grow in bogs and wet ground. July	.60	2.00	15.00	120.00
MITCHELLA repens (Partridgeberry). This is much in demand as a prostrate ground cover for shady places, but the foliage is not the only attractive feature, because the pink and white blossoms in Summer and scarlet berries in the Fall receive their share of attention.	.60	2.00	12.00	110.00
MITELLA diphylla (Mitrewort). The white flower stems of the Bishopscap are at home in the shady rock garden. They are 1 ft. tall and blossom in May.	.60	1.50	10.00	90.00
MONARDA didyma (Wildbergamot) (Beebalm). Making brilliant patches of scarlet in Midsummer, the Beebalm grows from 1 to 2 ft. tall and does best in moist sun or slight shade	.60	2.00	15.00	120.00
tall and bears pale purple blossoms. It blooms in Midsummer	.60	1.50	10.00	75.00

100 Price for 3 12 1000 MONESES uniflora (One-flowered Pyrola). A plant with beautiful single white, waxy flowers on a 4-6 in. stem, which blossoms in June. Prices per TUSSILAGO farfara (Coltsfoot). The masses of large leaves that	3	12	100	1000
appear along the clay banks and brooksides in late Summer are sel- dom associated with the Dandelionlike flowers which come up all alone in early Spring. Nevertheless they are the leaves of the	P() F()	De FA	010.00	200.00
Coltsfoot	\$0.50	\$1.50	\$10.00	\$80,00
TYPHA latifolia (Cattail). To give height and picturesqueness to the bog planting the common Cattail is useful	.50	1.50	8.00	60.00
UVULARIA perfoliata (Merrybells). The blossoms of the plant are like cream yellow Lilies in May. It grows 1 ft. tall in the rich woods and by roadsides.	.60	2.00	12.00	100.00
VERATRUM viride (Wild Hellebore). We have not yet called any flower a 'harbinger of Spring.' This sentence seems to have been used before, but in the case of the Wild Hellebore, it is quite true, for the large, bright green leaves arise from the bogs almost before anything else has started.	.60	2.00	12.00	80.00
VERBENA hastata (Blue Vervain). Slender spikes of royal purple rise 2 to 3 ft. tall in August from the roadsides and wet meadows	.60	1.50	10.00	90.00
VERNONIA altissima (Ironwood). Tall growing plant for moist, low ground. 4-6 ft. and with deep purple flowers, arranged in loose panicles at the tops of the stems	.60	1.75	12.00	
VERONICA officinalis (Common Speedwell). An ordinary little plant with creeping bright blue flowers but is useful for growing under Pine trees or almost any location either in sun or shade	.50	1.50	10.00	75.00
virginica (Culvers-root). This white flowering Veronica grows 2-4 ft. tall in moist woods or meadows and blossoms in late Summer	.60	2.00	15.00	
VINCA minor (Common Periwinkle). The Vinca minor or Blue Myrtle, while an immigrant, has become thoroughly naturalized. The best, low, evergreen ground cover in our opinion. Heavy field grown plants	.60	2.00	15.00	135.00
VIOLA blanda (Sweet White Violet). This is the tiny sweet white Violet of earliest Spring, which later in Summer develops leaves of such size that they are seldom associated with the tiny flowers of the Sweet White Violet	.50	1.50	10.00	80.00
canadensis (Canada Violet). A true northern Violet growing a foot tall, in rich woods. The blossoms are white with a purplish tinge	.60	1.75	12.00	100.00
conspersa (American Dog Violet). A leafy-stemmed blue Violet 6 to 8 in, tall from the rich fields and moist woods	.60	2.00	15.00	
hastata (Halberdleaved Yellow Violet). A yellow Violet common in the southern Appalachians with leaves shaped like arrowheads. Requires acid soil.	.60	2.00	15.00	
palmata (Palm Violet). A large flowering blue Violet of the dry				
woods. The blossoms sometimes measure 1 in across pedata (Birdsfoot Violet). This Violet has very large blue flowers and deeply cut leaves growing in a great many gardens but ought to be	.60	2.00	15.00	
seen in many more. It likes the open sun pedata bicolor. A most attractive native Violet the upper part of the large blossoms being blue and the under part the most royal purple	.60	1.75	10.00	80.00
imaginable. We cannot recommend it too highly	.60	2.00	15.00	140.00
the open field, blossoming freely in the early Spring rotundifolia (Early Yellow Violet). A tiny, bright yellow flowered Violet which is about the earliest to bloom, coming soon after the	.50	1.50	8.00	60.00
snow leaves. It grows in moist sun or shade	.50	1.50	10.00	80.00
pubescens (Downy Yellow Violet). The very tall northern variety with downy leaves. It blossoms in the rich woods in May	.60	2.00	15.00	120.00
WALDSTEINIA fragraoides (Barren Strawberry). It is too bad we haven't a better common name for the attractive wild flower. It is not common. The glossy green leaves and profusion of Strawberry-like blossoms appear in May and June. It prefers shade but is not particular as long as it gets moisture. It grows about 6 in. tall. Color bright yellow.	.60	2.00	15.00	120.00
ZIZIA aurea (Early Meadow Parsnip). This is common enough to us in Vermont but the yellow blossoms in May appeal to all visitors. It grows from 1 to 2 ft. tall and thrives by the roadsides	.60	1.50	10.00	75.00

The Hardy Ferns of New England

Almost the most useful group of all hardy plants are our ferns for there is scarcely a place where the judicious planting of them will not improve it. Their hardiness and useful beauty should endear them to all. Little fellows for the rockery and big fellows for the field and bog. For sun or shade there is a wide range of varieties.

Vermont is the home of the best ferns. Almost every variety native to temperate North America grows here and our plants are much heavier and stronger than those from other sections.

Prices per	3	12	100	1000
ADIANTUM pedatum (Maidenhair). This most graceful of ferns grows on shady banks among the rocks of the rich woods. It grows 2 ft. tall and is one of the finest		\$2.00	\$12.00	\$90.00
ASPLENIUM platyneuron (Ebony Spleenwort). This fern cannot be excelled for a small fern for the shaded rockery. The 6 in. ebony stems and graceful habits are entrancing	1.00	2.50	16.00	150.00
trichomanes (Maidenhair Spleenwort). This may safely be called the daintiest of all the ferns. It grows from 4 to 6 in. tall and prefers the shaded rocks.	1.00	2.50	16.00	150.00
ATHYRIUM felixfemina (Lady Fern). This is a very easily grown, graceful, 2 to 2½ ft. fern, preferring partial shade but will succeed in full sun here in the north	.60	1.50	10.00	80.00
pycnocarpon (Narrowleaf Spleenwort). A large, clean looking fern growing 2 ft. or more in height and found in the company of the Crested Woodfern of the swamps	.75	2.50	18.00	
thelpytroides (Silvery Spleenwort). The Silvery Spleenwort resembles the Lady Fern somewhat in size and shape but the spores on the fruit fronds give it a silvery sheen. It likes a partial shade	.90	2.50	16.00	150.00
BOTRYCHIUM matricariae (The Broadleaf Grapefern). This Grapefern grows about 6 in. tall and with a single leaf. It is often confused with the exceedingly rare Moonwort. It grows in open meadows.	.75	2.50		
dissectum (Cutleaf Grapefern). This is a finer cutleaf variety than the Rattlesnake Fern	.60	2.00	14.00	
obliquum (Ternate Grapefern). The fruit spores are borne on a stalk separate from the leaf stem. Otherwise it is similar to Rattlesnake Fern and likes open sun.	1.00	3.00	18.00	160.00
virginianum (Rattlesnake Fern or Grapefern). An attractive fern with unusual fronds for the open woods. It grows 12 to 18 in. tall	.60	2.00	14.00	125.00

Prices per CAMPTOSORUS rhizophyllus (Walking Fern). It has received its name from its peculiar appearance and a novice might not suspect	3	12	100	1000
its being a fern. It grows naturally on the rocky cliffs and roots from the tips of the fronds.	80.60	\$2.00	\$15.00	
CYSTOPTERIS bulbifera (Berry Bladderfern). It is nearly always found growing wild on the rocks by the side of small brooks. The long weeping fronds are over 2 ft. in length	.60	2.00	15.00	\$120.00
fragilis (Fragile Bladderfern). This is a rather more delicate fern, resembling the above	.60	2.00	15.00	120.00
DENNSTEDTIA punctilobula (Hay-scented Fern). A fern which forms dense mats of fragrant fronds 1 ft. tall and is one of the best for open sun or woods. When bruised the fronds give off an aroma like new mown hay. This is a good fern for naturalizing	.60	1.50	10.00	75.00
Sods of Hay-scented Fern about 10 in square	1.00	3.00	20.00	175.00
DRYOPTERIS clintoniana (Clinton Woodfern). A very large type of				
the crested Woodfern growing to nearly 3 ft. and almost evergreen	.60	2.00	12.00	
cristata (Crested Woodfern). A rather uncommon Woodfern with dark green fronds from 1 to 2 ft. tall and at home in shady swamps.	.60	2.00	12.00	
goldiana (Goldie Fern). This is the largest of all Woodferns with a chaffy stem and rich dark green fronds from 2 to 4 ft. tall	1.50	5.00		
 hexagonoptera (Winged Woodfern). This was formerly called the Broad Beechfern. It resembles the Narrow Beechfern except that the fronds are wider than they are long. It is not very common intermedia (Fancy Fern). The fern used extensively by the florists 	1.00	3.00	20.00	
and picked by millions in the Fall. It prefers the rich woods and attains a height of 2 ft.	.60	2.00	12.00	90.00
linneana (Oakfern). A very tiny attractive 6 in. fern with branched fronds. It likes moist shade	.75	2.00	15.00	130.00
marginalis (Evergreen Woodfern). The evergreen fronds are leathery and remain attractive throughout the Winter. This fern likes the	00	1.77	10.00	00.00
rich woods	.60	1.75	10.00	80.00
scented Fern and grows naturally in the marshy woods and meadows. phegopteris (Narrow Beechfern). The fronds of the Beechfern are	.60	1.50	10.00	60.00
borne at the top of the 6 to 8 in. stems and are shaped like arrowheads. It requires shade	.60 .60	$\frac{1.50}{1.50}$	$\frac{12.00}{10.00}$	$80.00 \\ 75.00$
LYGODIUM palmatum (Hartford Fern). At last we have a fine supply of this very rare Climbing Fern or Hartford Fern. It grows in acid soil to a height of 2-4 ft. climbing up other plants like a true vine. The foliage is most attractive and we are sure that our customers will be glad to get this fern which has been almost extinct	1.50	5.00	35.00	
ONOCLEA sensibilis (Sensitive Fern). A fern which grows small in the open meadows but attains a height of 3 ft. in the wet shade	.60	1.50	10.00	75.00
OPHIOGLOSSUM vulgatum (Adderstongue). This is a quaint fern with a single leaf and the stem of the Adderstongue seems sufficient for its single oval leaf and the fruit stalk. It is considered rare but we have it in considerable quantity. It thrives best in the cold open meadows and grows from 6 to 12 in. in height	.75	2.50	18.00	
OSMUNDA cinnamomea (Cinnamon Fern). The immense fronds of this fern are 4 ft. tall with the fruit stem rising from the center of the plant. This is a fern for partial shade or open meadows claytoniana (Interrupted Fern). Possibly this is the largest of our native ferns, attaining a height of 6 ft. It is at home in the open	.60	2.00	15.00	120.00
woods and moist fields	.60	2.00	15.00	120.00
of all ferns. It grows to 3 ft. in shady bogs but is smaller in open land. regalis gracilis (Slender Royal Fern). A somewhat slenderer fern than	.60	2.00	15.00	120.00
the Royal and apparently at home in drier soil	.60	2.00	15.00	120.00
evergreen fern forms mats on the shaded rocks	.60	1.75	12.00	80.00
POLYSTICHUM acrostichoides (Christmas Fern). A 12 to 18 in. evergreen fern called Dagger Fern by florists. Fine for shaded rock gardens and may be grown indoors in Winter	.60	2.00	12.00	90.00
extremely rare, but plentiful in many Northern locations	1.00	3.00		

Prices per	3	12	100	1000
PTERIDIUM aquilinum (Bracken). The Eagle fern of the open, sunny hillsides, growing to a height of 2 ft	0.50	\$1.50	\$10.00	\$60.00
PTERITIS nodulosa (Ostrich Fern). This fern has graceful plumes, and grows in moist hollows and along the sunny brooks and ponds. It has plumes 4 to 6 ft. tall	.60	2.00	13.50	90.00
WOODSIA ilvensis (Rusty Woodsia). This grows from 6 to 8 in. tall and has a brown appearance due to myriads of small brown hairs. A fern for sunny rocks	.60	2.00	15.00	120.00
obtusa (Blunt-lobed Woodsia). This most charming variety of the rocky woods grows to a foot tall	.60	2.00	13.50	100.00
WOODWARDIA areolata (Chainfern). A fern which is native to the wet lands along the Atlantic coast. The fruit spores resemble chain				
links from which appearance this fern gets its common name	.60	2.00	15.00	120.00
virginica (Virginia Chainfern). This resembles the areolata, but is somewhat larger	.60	2.00	15.00	120,00

RHODODENDRONS AND AZALEAS

We have practically all varieties of native Azaleas and Rhododendrons, as well as native shrubs, vines, and evergreens, but as these are listed in our regular catalog, we are omitting them from our wild flower catalog this year.

NATIVE PLANTS ESPECIALLY ADAPTED TO ROCK GARDENS

Varieties marked * are suited to shady rocks. Unmarked for sun. *Oakesia sessilifolia Veronica officinalis

Oenothera speciosa

Polemonium reptans *Polygonatum biflorum

Potentilla tridentata *Pyrola elliptica

Ranunculus bulbosa

*Sanguinaria canadensis

Saxifraga virginiensis

Silene pennsylvanica Silene virginica *Tiarella cordifolia

*Trientalis americana

*Phlox divaricata

Phlox subulata

Phlox pilosa

*Phlox reptans

Salvia azurea

*Trilliums *Uvularia perfoliata

*Actaea alba *Actaea rubra

*Aquilegia canadensis *Aquilegia caerulea *Aquilegia chrysantha

*Campanula rotundifolia *Claytonia virginica

Corydalis glauca Dianthus deltoides *Dicentra canadensis *Dicentra cucullaria

*Geranium maculatum *Geranium robertianum *Hepatica acutiloba

*Hepatica triloba Iris cristata *Iris verna

Lewisia rediviva Linaria vulgaris *Mitella diphylla

Lobelia cardinalis Lobelia siphylitica

Lythrum salicaria roseum Mentha peperita Mentha spicata Monarda didyma Ranunculus repens

*Viola pubescens **FERNS** *Oakfern *Beechfern *Common Polypody *Christmas Fern *Woodsias *Maidenhair Fern *Ebony Spleenwort *Maidenhair Spleenwort *Walking Leaf Hay-scented Fern *Fancy Fern *Winged Woodfern *Bladderfern

*Viola canadensis

Viola pedata bicolor

Viola pedata
